Hydra Rain Barrel
ideal for main roof downspout

- 116 gallons, 48" wide, 18" deep, 54" high.
- Lightweight but sturdy plastic.
- Passive overflow outlets and hose can be directed onto a permeable surface or back into a drainstump.
- 8" Filter screen (see top left photo) as inlet prevents debris from entering barrel and assists in keeping mosquitoes out.
- Three threaded spigot locations:
  - Two low on each side
  - One in the middle and 15" high to use with a watering can.
- Overflow tube located near top of the barrel - 1.5" diameter.
- Made in the USA of 100% recycled resin.
- Barrels can be coupled together for increased capacity.
- Includes: Rain barrel, mosquito-proof filter, overflow tubing, one spigot, and a one year warranty.

For more information, including installation and maintenance options, contact StormWorks at 412-243-7680 or at info@stormworkspgh.com Monday-Friday, 9am-5pm.

Rain Barrels

Combined Sewer Overflows (CSOs) occur whenever a tenth of an inch of rain falls.

When CSOs occur in Etna, untreated sewage and waste flow directly into the Allegheny River and Pine Creek.

Rain Barrels are one of the easiest solutions to CSOs.

It attaches to your house just as your down spout does, but collects the rain water instead of sending it into the sewer system.

The benefits to having a rain barrel in your yard are:

- Reduced flooding in your yard and home
- Lower water bills
- Free water for watering your lawn, garden or even washing your car on dry days
- Cleaner drinking water

Etna's Green Master Plan Rain Barrel Program
Please read the Instructions prior to completing the Agreement

INSTRUCTIONS
DOWNSPOUT DISCONNECTION

1. The Downspout Disconnect Agreement must be filled out completely
2. Please choose the downspout color and indicate how many downspouts need disconnecting
3. Signature and contact information is required
4. Return Agreement to:

Borough of Etna  
437 Butler Street  
Pittsburgh, PA 15223  
412-781-0569  
Fax: 412-782-5302  
Email: jjankowski@etnaborough.org
BOROUGH OF ETKNA
DOWNSPOUT DISCONNECT PROGRAM
HOLD HARMLESS AND INDEMNIFICATION AGREEMENT

Some older homes have downspouts that drain rainwater from gutters into the ground, which are connected to combined sewers. On heavy rain days, these combined sewers cause overflows, called CSOs. To help protect the environment and local waterways, the Borough of Etna, offers a free annual program to disconnect those downspouts, cap the drainway, and add an extension to the downspout so the water drains into your yard instead of the combined sewer. Please fill out this Hold Harmless and Indemnification Agreement to receive your free downspout disconnection.

1. I, the undersigned, am owner of the property described below.

2. I understand that my downspouts are being disconnected in accordance with Municipal Code of the Borough of Etna, Ordinance 1341 and the Allegheny County Health Department Plumbing Code.

3. I understand that the Borough of Etna is offering free technical assistance for determination of eligibility.

4. Once a downspout is disconnected, it will be my responsibility to ensure that the replacement facility, which will be my personal property, is not removed and remains properly maintained and operated.

5. I, the undersigned, hereby indemnify and hold harmless the Borough of Etna for any and all damages resulting from the disconnection of downspouts.

## DESCRIPTION OF WORK TO BE DONE

- [ ]
- [ ]
- [ ]
- [ ]

Date Fee Paid ____________________________

Cash _______ or Check No. ____________________

Homeowners may perform this work for their own single-family, owner-occupied dwelling.

Please call 412-781-0569 to schedule an inspection after completing work.

All work must be inspected before it is concealed or covered up.
RESIDENTIAL DOWNSPOUT DISCONNECTION PERMIT APPLICATION

Residential Downspout Disconnection Permit Requirements:

- A downspout disconnection permit must be obtained before work can begin.
- A downspout disconnection permit is valid only for the disconnection work being performed. It does not eliminate the need for additional permits required by this Etna Borough Code of Ordinances or other governmental agencies.
- A permit is valid for one year.
- All work must be done in accordance with State, County and Borough rules and in a competent manner.
- Work must be permanent, no temporary caps or plugs such as internal gripper plugs.
- Work must be inspected before being covered up or concealed.
- Any previously allowed or permitted connections to the sanitary sewer shall be disconnected.
- Any disconnected drain shall be directed so as not to cause flooding or water damage in any portion of the building or in any adjacent building, structure or property.
- Any previous disconnection work that does not meet these standards will also require a downspout disconnection permit to complete work needed to comply with this ordinance.
- An owner-occupant of a single-family dwelling may perform work at their dwelling; all other work must be done by a licensed plumbing contractor.
- Any disconnection, plugging, capping, rerouting, altering, or modifying must be done in accordance with all applicable State and County rules and Borough of Etna ordinances.
- Please call 412-781-0569 to schedule an inspection.

To apply for a time extension:

Request a Time Extension Application by calling the Downspout Disconnect Program at 412-781-0569. A $10.00 filing fee payable to the Borough of Etna must accompany the application submission.

Please call 412-781-0569 to schedule an inspection after completing work.

All work must be inspected before it is concealed or covered up.
